

# vPIN™

## The smallest PCI PED certified audio jack PIN PAD

**vPIN** is a PCI PED compliant magnetic card reader and PIN entry device which uses a USB or audio-jack interface to capture secure card-holder data. When combined with VaultPOS™ software, **vPIN** enables PIN-based debit and credit card transactions to be processed on mobile devices from Android®, Apple® and BlackBerry®.

PIN-based transactions provide the lowest transaction costs to merchants, reduce the risk to acquirers, help fight charge-backs and minimizes discount rates.

### *Compatible Devices:*
